

A Book in Progress

MULTI-FUNCTIONAL HEDGEROWS: Buffer Zones, Shelterbelts and Wind breaks

Table of Contents

• Introduction

History and Background
Definition of Terms
The Functions: Hedgerows, Shelterbelts, and Windbreaks.
Wildlife Habitat, Income Producing

Shelterbelts

• Beneficial Insects

Beneficial Borders
Farmscaping with Insectary Plants
Plants known to Enhance Habitat for Beneficial Insects
List of Beneficial insects

• Wildlife

Plants to Attract Wildlife
Naturescaping
Wildlife of Meadows and Hedgerows
Landowner's Guide to Wildlife Management
Windbreaks for People: The Wildlife Connection
Ways to Attract Non-Game Birds
Birds of Prey Assist Farmers
Controlling Critters Without Chemicals
Riparian Areas: Fish and Wildlife Havens
Managing Deer on Small Woodlands
"Wild About Farms"

• Shelterbelts

Shelterbelts: Excerpts from People/ Plants/ and Environmental Quality
Shelterbelt Influence on Great Plains Field Environment and Crops
Forests and Global Change: Opportunities to Increase Tree Planting in
Shelterbelts and the Potential Impacts on Carbon Storage and Conservation

• Windbreaks

Windbreaks: Design, Benefits, Wind flow, Wind Erosion,
Plant characteristics of: Wind Tolerant Plants
Windbreaks: Function and Effects
Windbreaks For Rural Living
Windbreaks for Sustainable Agriculture Systems
Planting a Windbreak
Supplemental Moisture for Windbreaks
Windbreak Effects on Field and Row Crops
Herbaceous Windbreaks
Wind Erosion Control of Windbreaks
Windbreak Economics
Management of Microclimates with Windbreaks

• **Income Producing Products**

Wood Products: fuel, chip logs; for bedding & mulch
- coppice: regeneration of craft materials such as willow
Secondary wood products: firewood, lumber and chips
Medicinal: Herbs, leaves, roots, bark, seeds
Floral materials: Sword fern, salal, willow, twinberry
Propagation: Seeds, rootstock, cuttings, transplants
Food Sources: Leaves, berries, nuts, roots, shoots, fungi
Honey and other hive products
Building material: Bamboo, fence posts, black locust
Charcoal
Dye plants
Needs of wildlife: food, cover, water, shelter, space
Game birds
Sequester Carbon: Credits

• **Establishment and Maintenance**

Long Term Commitment
Location, Function and Size
Layout and Design
Soil Preparation
Management of Microclimates with Windbreaks
Plants, Weeds, Watering
Mulching for Fertility

• **Plant Lists and Templates**

Template Instructions
Explanation of Plant List Categories
Template Plant List for Hydric Zones
Template Plant List for Lowlands
Template Plant List for 5' Plantings
Deer Resistant Plants

• **Resources**

Books and Websites Available for Research
List of Nurseries That Specialize in Wildlife Food Planting
Fish and Wildlife: Partners for Wildlife Program
Habitat Restoration Projects
